

Land Rover Elgin

Car Dealership - Elgin, Moray.

The Works

- 47kWp JA Solar PV system
- 30kW SolarEdge Inverters
- 64kWh Containerised ESS Battery Storage with built-in fire suppression and HVAS system

The Results

Land Rover Elgin now benefits from a modern renewable energy system that delivers both environmental and economic value, with 7.26 tonnes of CO₂ saved annually – equivalent to planting 334 trees per year, alongside an estimated payback period of 10.9 years. Overall, the installation offers improved energy resilience and long-term reduction in grid dependency.
