

Ross-Shire Engineering - Machine Shop

Engineering Facility - Inverness, Scotland.

Operating with a 10-year old solar PV system that increasingly exhibited performance issues, Ri Cruden were enlisted to design and install a comprehensive renewable energy system that not only enhanced overall efficiency, but created a significant growth in return on investment for the business.

The System

- 138 x 410W DMEGC Solar Panels 56.58kWp
- 1 x 16kW SolarEdge SE16K Inverter
- 1 x 30kW SolarEdge SE30K Inverter

Contractor: Ri Cruden

Year: 2022

"We used Ri Cruden as we have worked together for a number of years and they have installed really high quality projects for us and they provide a reliable service. I would definitely recommend Ri Cruden to anyone looking to install solar panels in the future, they provide a reliable service, top-quality delivery and really efficient processes!"
