

Oliver Pirie

Retrofit Home - North Kessock, Scotland.

In search of a way to reduce energy costs and enjoy consistent, year-round heating, RI Cruden were delighted to work with Oliver Pirie to replace his ageing 20 year old oil boiler. Following a smooth and professional installation of an ASHP and Cylinder, alongside upgraded pipework and radiators to help maximise efficiency, Oliver now benefits from a more sustainable, cost-efficient home with reliable, consistent heat throughout.

The Works

- 16kw Gen 7 Samsung Air Source Heat Pump
- Zenith 300ltr DHW Cylinder combined with 70ltr buffer
- Removal of thermal store and relocation of cylinder
- Upgraded radiator system with Hive controls
- Deionised water used for Radiator System

Year: 2025

"From my initial enquiry to quotation, all the way through to final installation, the team were very responsive to communication and detailed at every step of the way. Throughout the whole installation process, the entire Ri Cruden team were super, and the project is incredibly neat and tidy throughout my entire property. We're very happy to recommend both Ri Cruden and the switch from an oil-fired boiler to a heat pump for older properties"
