

RiCRUDEN

Hi, I'm...

Jamie Carmihan

Apprentice Electrician

What are the three words to describe your apprenticeship?

Technical

Intellectual

Future Prospects

Why an Apprenticeship?

I wanted the opportunity to learn a new set of skills that will set me up for the future!

Why Ri Cruden?

I chose Ri Cruden for its strong reputation in the region and the high-quality training the company provides.

What is your best memory so far?

I really enjoyed being part of the completion of Royal Dornoch and Milton of Leys Care Home.

What is your favourite part of your job?

I love learning from the team I work with, and picking up tips and tricks from all those on site.

A little bit more about me...

Upon leaving school, I knew I wanted a job where I could build a practical skill set that would open the doors for my future, and something hands on. Now already halfway through my SCQF Level 7 qualification, I have had the opportunity to gain hands-on experience at some of the regions largest projects since I joined the team in 2023.

I often get asked what a typical day on site is like, but believe me, no two days are never the same... that being said, it will always start with a briefing that sets out what I'll be working on, and from there it can go in all sorts of directions! Some tasks only last a day, while others run over much longer, and that variety is something I really enjoy.

Looking back at my time since joining the company, I'm super proud of the progress I have made and the confidence I have gained, and I am excited to keep growing as I work through my qualifications.

What is one piece of advice you have for aspiring apprentices?

Stay keen and always listen to feedback
